**Subject:** Re: August Fungi PCB Research Meeting

Hi, everyone.....I won't be able to attend Wednesday's meeting. Although it's my day off, I have 2 other volunteer activities that require my attention 10-noon PDT. I love being popular! ☐  
I don't have any comments at this juncture from a safety perspective. Good laboratory safety practices are still encouraged. If larger scale operations are considered in the future, having someone with an industrial hygiene background review the process to determine if respiratory protection and/or other personal protective equipment is warranted (based on qualitative or, even better, quantitative exposure assessment) would be valuable.

Hope you are all having a great summer. If anyone has safety-related questions they can email me and we can exchange information or arrange a time to talk.

All

The materials for the August 10th meeting (10am-12am PST) are attached and summarized below. The meeting will be held at The Lands Council second floor small conference room or you are welcome to call into the conference line (see the agenda for the address and conference number). This meeting will focus on: providing the group with an update on the research project (tasks complete/underway) and to request feedback from the group regarding upcoming tasks 5 (Vactor Waste Samples) and 6 (Sampling). If you are not able to attend the meeting, please email me any comments you have on the attached documents by Friday August 12th. *(Note: All the attached documents as well as all prior meeting documents are saved in the dropbox folder).*

- Agenda
- VW Expdesign 8-3-2016
- Mycoremediation PP for Public Works FINAL (*specifically slides 10-15*)

Please let me know if you have any questions and I look forward to talking with all of you next week.
